Number of files: 14
Official DR value: DR7

=====

A complete re-edit or re-master or re-sample (or "digitally enhanced") for ALL tracks, even if not noted there. Worst example: 2
With a DR value of 7, this is absolutely "out of question". (Digital) compressor and limiter used (almost)

679-5144229332

to the max, making most tracks far away from any originality. Some digital distortion audible in high frequencies (treble).

Stereo on many, but mono on 2, 9, 12. DC offset audible on 4, 10.

Even the masters originally used are not great.

Red because of unlistenable "digital" distortion. Avoid under all circumstance if you like to hear the original sound. If you need a bad example how wrong mastering can be, buy it.

2/2/3.....Red
