Maximum peak difference (-0.24 dB - -1.39 dB): 1.15 dB

Official DR value (Song Mode): DR10

=====
Tracks marked over peak at -.24, so risk of distortion is present. Dynamic range is good, but

could be better.

Most tracks (except for track 8) have had their peaks 'shaved off' to make for a more

consistent listening experience.Reviewed by JayTee

Comments by Eliot Ness

"Peaks shaved off" is not totally correct, even if it looks so.

It was the limiter + compressor duo used on all these tracks except #8. Maybe better to say

"peaks made equal" over all tracks.

Stereo image fine.

Frequency response comes close to great, although the bass may be just a little too deep.

No tape defects are present.
