 Number of files: 18
 Official DR value: DR12

=====

Peaks and DR readings flawless. Frequency response over 5k limited on many earlier tracks, prob. by original analogue tape (or tape/background noise filtered by high cut ?) - so the highs could be crispier there (1-8, 10). Bass response is fine. Not surprisingly, the later tracks (9, 11, 13-18) are the better sounding tracks here (even missing the 5k treble limit). All stereo, as good as possible. Minor tape/background noise on some tracks (11). Good DR value. Low RMS value that let these recordings really "breathe".
